

**Some important reminders:**

- All materials must be listed and approved for their specific uses.
- If you hire a plumbing contractor, he or she must be licensed with the Construction Contractors Board.
- Journeyman plumbers must have a current license with the Oregon Building Codes Division.
- Lawn sprinklers may be installed only by licensed landscape contractors and permits are required to connect lawn sprinklers to your building's water supply.
- If you are using a licensed contractor, he or she is required to obtain all necessary permits for the work being performed.

**If you have questions concerning your eligibility to work on a building, call the Building Codes Division, 503-378-4133 or 800-422-7457, or your local jurisdiction.**

# Common Questions and Key Information Regarding Plumbing Permits

## When do I need a permit for plumbing work?

### A plumbing permit is required when you:

- Replace a water heater or underground piping.
- Alter piping inside a wall, ceiling, or beneath a floor.
- Install a plumbing fixture where one did not exist previously.
- Make an emergency repair or alteration on a section of pipe five feet or longer.

### A plumbing permit is not required when you:

- Repair or replace a sink, toilet, or faucet not concealed in the wall.
- Replace or repair countertops, shower heads, rain gutters, or downspouts.
- Resurface shower walls or regrout tile.
- Add to or alter an irrigation system with an existing approved backflow device.
- Install a water filter.
- Replace a hose bibb.
- Install a water feature or exterior hot tub that is filled by a hose.
- Install new piping less than five feet in length.

If you are still not sure if you need a permit, check out [PermitsProtect.info](http://PermitsProtect.info); it is a great resource for additional information.

## Where do I get a permit for plumbing work?

Permits are issued by your local building department. Visit [PermitsProtect.info](http://PermitsProtect.info) to locate the proper jurisdiction based on your address.

## How do I get a permit for plumbing work?

1. Locate your local building department.
2. Complete the permit application – Jurisdictions offer permit applications at their office and many also provide them online or via fax.
3. Pay the permit fee – Permit fees are based on the size and complexity of your project and are paid when the permit is issued.
4. Receive your permit – A permit will be issued in the name of the person performing the work and the work can begin once the permit has been issued.

## How do I get an inspection?

If you are having the work done by a contractor, be sure you are both clear on who will be responsible for scheduling the inspection.

### Follow these steps:

- Call the request line at the building department responsible for your area at least 24 hours in advance.
- When you call to make the appointment, have all the details (permit number, project address, etc.) available.
- If the work was done inside, an adult needs to be at the site for the inspection.

### Some important reminders:

- If you have installed water piping, the work must be operational and exposed for the inspection.
- Inspectors may require that drainage piping be plugged and filled with water during the inspection.

## How do I plan to do plumbing work on my home?

You have two options to get the work done, you can:

1. Hire a licensed plumbing contractor.
2. Do the work yourself without a license.

Anyone else who is not a licensed plumber legally can not do the work. This includes friends, neighbors, tenants, and general contractors.
